November 2021 Edition

November Editorial

This editorial is from co-editor Izabella Finol-Bishop

Recently, I was talking to a friend about how this school year passed by so quickly. It feels like it was August yesterday, but now it's November, like all that time was wasted away and now suddenly it's gone. I think this is because people aren't used to stopping what they are doing to pay attention to all the little things around them. Sometimes we get so caught up in all of the things that can be overwhelming and frustrating, and we fail to see all that is good. Some things are so small that we might just think of them as insignificant. If you're ever having a rough time, or you feel as if your recent past has been "unmemorable", think about those little things that you find comfort in, like your favorite book, or song, or even just a tree you pass by when you're walking home. When we learn to appreciate this type of stuff, we are happier and we have a better time. This November, (and always), be thankful for the things we normally overlook, as well as the more obvious ones.

Thank you for reading my editorial.

Sudoku

4		6	7	5	1		8	
2		8				4	7	
						9		6
5	3		2					
6	4	9	1	3				
		7	9		5	1		
	7		8	2	9		5	
	6	2		1			3	8
1	8				7			9

How to play

The goal of sudoku is to complete a 9x9 grid with numbers so that each column, row, and 3x3 grid have the numbers 1-9. At the start, the 9x9 grid will have some squares filled in. The goal is to try to fill in the missing numbers and complete the grid. A row, column, and 3x3 grid can only use numbers 1-9 once. So, if a row has a number in it, it can't be used again in that row, even in another column or 3x3 grid. Good luck!
